

Fellowship In Brain Injury Rehabilitation

Program Director:

Dr Jehane H Dagher, MD, BScPT, FRCPC, FABPMR

Physiatrist

Chief of Traumatic Brain Injury (TBI) Program

Assistant Professor – Physiatry, University of Montreal

Institut de Readaptation de Montreal

Assistant Professor - Physical Medicine & Rehabilitation, McGill University

Montreal General Hospital

Phone:(514) 340-2085 Fax : 514-340-2775

Fellowship Location

CIUSSS Centre-Sud de l'île de Montréal

Institut de réadaptation Gingras-Lindsay-de-Montréal (IRGLM)

Rehabilitation Center

6300 Avenue de Darlington, Montreal, Québec H3S 2J4

Center of expertise in intensive functional rehabilitation of Traumatic Brain Injury patients for the Island of Montreal

- 18 inpatient hospital beds
- outpatient follow-up clinic of several hundred of patients with TBI

Candidate Requirements:

- M.D. having completed his/her postdoctoral training in physical medicine and rehabilitation (physiatry)
- Strong interest in neuro-rehabilitation specifically TBI
- Good command of French, spoken and written
- Has own source of financial support for the duration of fellowship (bursary or PGY6)
- Internship of 6 months minimum to 2 years maximum
- One letter of intent
- Three letters of recommendation by supervising attending physicians and staff

Candidate involvement:

- Overall care and management of patients hospitalized in inpatient intensive functional rehabilitation
- Active participation in multidisciplinary team rounds
- Participates in outpatient traumatic brain injury (TBI) follow-up clinics
- Participates in specialized clinics (spasticity)
- Participates in the on call lists of physiatrists at the IRGLM
- Participates in teaching of medical students and residents
- Participates in a research project in the field of TBI
- Presents in continuing medical education meetings at the IRGLM

Learning objectives :

- Develop an expertise in the medical and paramedical treatment of TBI
 - Differential diagnosis, investigation and treatment of mild to severe TBI
 - Investigation, treatment and complications post TBI
 - Medical and neurological / neurosurgical emergencies post TBI
 - TBI prognostication
 - Distinguish by clinical examination coma, vegetative state and minimally conscious state; recognize and know the treatment for each
 - Know the differential diagnosis, investigation and treatment of post-traumatic agitation.
 - Know the differential diagnosis, investigation and treatment of post-traumatic amnesia
 - Recognize the differential diagnosis, investigation and treatment of post TBI headache
 - Know the differential diagnosis, investigation and treatment of post-TBI cognitive disorders
 - Know the differential diagnosis, investigation and treatment of behavioral disorders
 - Know and treat psychiatric disorders linked to the TBI and know how to direct patients to appropriate stakeholders
 - Know and treat neuromusculoskeletal complications in patients with TBI
 - Know the pharmacology used in this population (antidepressants, psychostimulants, atypical antipsychotics, mood stabilizers, anticonvulsants etc.)
 - Know the hospital, rehabilitation and community resources for this clientele
 - Know the orthoses of upper limb / lower and their indications in a patient with neurological deficit
 - Know the outcome measure tools applicable to TBI subjects
